

Leverage ESSER Funding to Bring Entrepreneurship Education to Your School

BUILD Aligns with ESSER Funding in 3 Ways:

- 1.** Activities to address unique needs of low-income students, English learners and students of color
- 2.** Afterschool programs and summer learning including classroom or online learning
- 3.** Addressing the social and emotional needs of students with a focus on equity

Why Entrepreneurship Education?

Entrepreneurship Education empowers youth and their ideas by providing them the ability to create solutions to real world problems. Through project-based learning, students are better able to connect the dots between what they learn in school and the real world. As a result, students stay more engaged in learning and develop critical 21st Century 'Spark Skills' including communication, collaboration, innovation, grit, problem-solving, & self-management.

Why BUILD?

Use entrepreneurship to ignite the potential of youth from under-resourced communities and propel them to high school, college & career success

The BUILD program aligns 100% with ESSER funding requirements. At BUILD.org, entrepreneurship is the spark, college, career, and life success are the goal. We equip young people with the mindset and skillset they need to thrive in an uncertain world, equipped with the mindset and skills to adapt, pivot, invent, and reinvent themselves with the support of mentors and volunteers along the way.

For over 20 years, BUILD has used entrepreneurship education as a vehicle to tap into the hidden potential of youth of color. By providing engaging and high-quality, real-life experiential learning, our youth have gained critical social and emotional learning skills while building social capital.

In the 2020-2021 School year, BUILD provided entrepreneurship programming and training for...

15,000+ Youth

400 Educators

in 53 Cities
